

NGÔ ĐĂNG HÁN

Fullstack Developer

0963439807 ◇ Ha Dong, Hanoi ◇ ngodanghan.work@gmail.com

OBJECTIVE

Software engineer with nearly 3 years of experience building production systems, seeking long-term growth as a Fullstack Developer.

EDUCATION

Information Technology, Posts and Telecommunications Institute of Technology (PTIT) 9/2021 – 1/2026

SKILLS

Back-end	Java, Kotlin, Spring Boot, REST APIs, Spring Security, Hibernate/JPA, Microservices
Database	PostgreSQL, MSSQL
Cache	Redis
Message Broker	Kafka
Search	Elasticsearch
Realtime	WebSocket
Front-end	Angular, React, Vue 3
Authentication	Keycloak
Storage	MinIO
DevOps	Docker, Jenkins, GitHub Actions, Nginx, CI/CD, Ubuntu
Tools	Git, IntelliJ IDEA, VS Code, Postman

WORK EXPERIENCE

Fullstack Developer 10/2024 – Present
RABILOO COMPANY LIMITED

- Worked with Singapore-based customers.
- Implemented system integration with SQL Accounting tax software.

Fullstack Developer 10/2023 – 10/2024
FACENET.,JSC

- Developed, built, and deployed web projects with a CI/CD workflow.
- Implemented system integration with VNPT tax software.

PROJECTS

F-CIM CLOUD

- **Description:** Built an integrated ERP system for a steel manufacturing supply chain. The system helped increase daily quotation volume by **100%** and streamlined the workflow for sourcing required components after quotation.
- **Tech stack:** Java, Spring Boot, Angular, PostgreSQL, Docker, Jenkins.
- **Responsibilities:** Developed backend and frontend modules, integrated databases, integrated third-party systems, and set up CI/CD pipelines.

TEMPLATE

- **Description:** Developed customizable PDF document generation based on templates (docx, xlsx) and supplied input data. This reduced **90%** of code related to labels, reports, and forms in F-CIM CLOUD, improving maintainability and scalability.
- **Tech stack:** Java, Spring Boot, Apache POI, Doc4j, JodConverter, XML.
- **Responsibilities:** Designed and built the template processing engine and developed APIs for dynamic PDF generation.

TRANSPORT MANAGEMENT

- **Description:** Built a goods transportation management system to optimize logistics operations and track orders.
- **Tech stack:** Java, Spring Boot, Angular, MSSQL.
- **Responsibilities:** Developed order and shipment management features and optimized database queries. Improved approval workflows using Spring Boot annotations and AOP.

POS (Personal Project)

- **Description:** Built a POS system for a family retail store to support day-to-day sales operations.
- **Tech stack:** Java, Spring Boot, Vue 3, PostgreSQL, Docker, GitHub Actions, Nginx.
- **Responsibilities:** Developed the entire system end to end; integrated bank payments via a third party (Tingee); analyzed and implemented real store workflows; deployed to production.

CareerCoach (Personal Project)

- **Description:** Built an AI-assisted CV builder with cross-platform virtual interviews (Web and Mobile).
- **Tech stack:** Kotlin, Spring Boot, Vue 3, Flutter, PostgreSQL, Keycloak, MinIO, Redis, Docker, GitHub Actions, Nginx.
- **Responsibilities:** Developed and deployed backend and web frontend; implemented CV generation to keep format and output consistent across Web and Mobile; integrated Google Gemini for CV generation and virtual interviews.

SocialNetwork (Personal Project)

- **Description:** Built a microservices-based social platform with posts, comments, reactions, friends, follows, and real-time chat.
- **Tech stack:** Kotlin, Spring Boot, Microservices, Spring Cloud Config (Config Server), Spring Cloud Gateway (API Gateway), Consul (service discovery), PostgreSQL, Kafka, Redis, MinIO, Elasticsearch, WebSocket, Vue 3.
- **Responsibilities:** Designed and developed the system end to end using microservices; applied the Saga pattern for distributed transactions; implemented Spring Cloud Config, Spring Cloud Gateway, and Consul for centralized configuration, service registration and discovery, routing, and access control.

AWARDS

ICPC PTIT – Second Prize	2022
ICPC PTIT – Honorable Mention	2023
